

#5916

Brickmould 1 3/16"
with optional break-away J Channel

A traditional image

For renovations or new construction, this new brickmould will bring you back to the times of wood moldings without sacrificing the benefits of PVC.

Its strength, recessed lines, and overall look guarantee greater durability with a remarkable finish.

Screw flutes facilitate mechanical assembly to a subsill. Greatly improved unzipping techniques allow the use of an integrated J.

Brickmold #5916 popular renovation dimensions:
1 1/2" facing, 1 3/16" width, with a 1 1/8" overlap outside the frame without nailing fin.

For a cleaner finish, a white rounded coextrusion edging hides the joint between the frame and molding.
